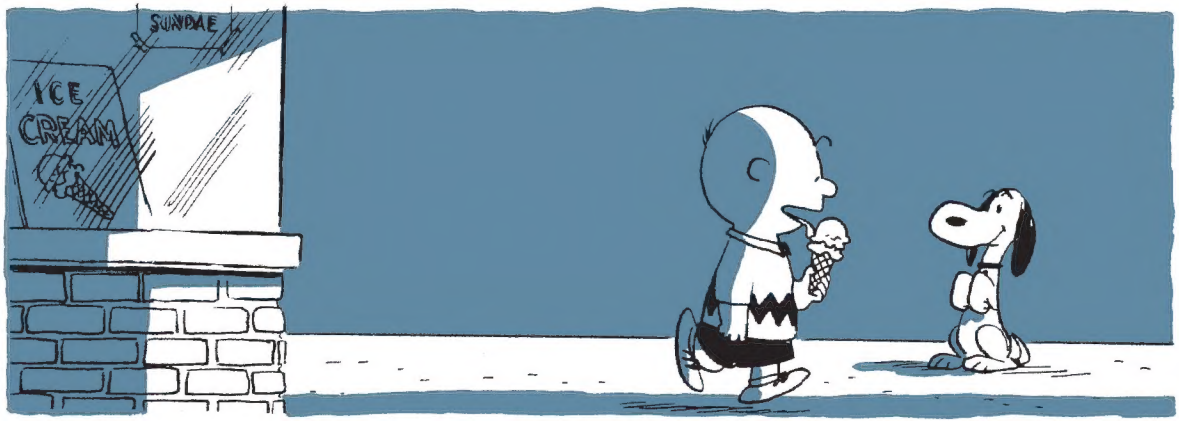
OL' DIME-A-DOZEN



FOREWORD by JONATHAN FRANZEN

Was Charles Schulz's comic genius the product of his psychic wounds? Certainly the Schulz depicted in Rheta Grimsley Johnson's authorized biography, *Good Grief* (1989), was a mass of resentments and phobias that seemed attributable, in turn, to emotional traumas in his youth: his unpopularity at school, his skinniness and pimples, the rejection of his drawings by his high school year book, the death of his mother on the eve of his induction into the army, the little red-haired girl's rejection of his marriage proposal, and so on. The man who became the best-loved artist on the planet was increasingly prone to attacks of depression and bitter loneliness. ("Just the mention of a hotel makes me turn cold," he told Grimsley.) Although he left his native Minnesota, he replicated its comforts in California, building himself an ice rink whose snack bar was called "The Warm Puppy." By the 1970s, he was reluctant even to get on an airplane unless someone from his family was with him. Here — the armchair psychologist might think — was a classic instance of the pathology that produces great art: wounded by adolescent traumas, our hero took permanent refuge in the childhood world of *Peanuts*.

But what if Schulz had chosen to become a toy salesman, rather than an artist? Would he still have lived such a withdrawn and emotionally turbulent life? I suspect not. I suspect that Schulz the toy salesman would have gutted his way through a normal life the same way he'd gutted out his military service. He would have done whatever it took to support his family — begged a Valium prescription from his doctor, had a few drinks at the hotel bar.

Schulz wasn't an artist because he suffered. He suffered because he was an artist. To keep choosing art over the comforts of a normal life — to grind out a strip every day for fifty years; to pay the very steep psychic price for this — is the opposite of damaged. It's the sort of choice that only a tower of strength and sanity can make. The reason that Schulz's early sorrows look like "sources" of his later brilliance is that he had the talent and resilience to find humor in them. Almost every young person experiences sorrows. What's distinctive about Schulz's childhood is not his suffering but the fact that he loved comics from an early age, had a gift for drawing, and was the only child of good parents.

This is not to say that the depressive and failure-ridden Charlie Brown, the selfish and sadistic Lucy, the philosophizing oddball Linus, and the obsessive Schroeder (whose Beethoven-sized ambitions are realized on a one-octave toy piano) aren't all avatars of Schulz. But his true alter ego is clearly Snoopy: the protean trickster whose freedom is founded on his confidence that he's lovable at heart, the quick-change artist who, for the sheer joy of it, can become a helicopter or a hockey player or Head Beagle and then again, in a flash, before his virtuosity has a chance to alienate you or diminish you, be the eager little dog who just wants dinner.

On page 183 of the current volume you will find a strip in which Snoopy grabs Linus's blanket in his teeth, swings Linus round and round in the air, sends him flying skyward, and reflects: "I'm the first dog ever to launch a human being!" This strip probably refers to the Russian space dog Laika, who was launched in November 1957, but it could also serve as a description of the volume as a whole. In the 1960s, *Peanuts* would break free of gravity altogether — achieve a degree of popularity for which there was not remotely any precedent, abandon all pretense of depicting realistic children and animals, and attain the stylistic escape-velocity at which an artist is no longer shadowed by any precursor but

himself. What launched the strip to such heights was, above all, the character of Snoopy. The years 1957 and 1958, which this volume covers, find Snoopy being transformed from a cartoon dog into the I-am-what-I-am of later years. These are the years when his snout reaches maximum extension, double or triple its original length. He still sheds fur, fetches balls, chases birds, and licks people for no reason; but now, for the first time, he does things that aren't conceivably doglike; he stands on Schroeder's piano and plays a violin; he suits up for baseball. Meanwhile, the children's personalities are settling into their now-familiar contours, and Schulz is developing the longer narrative sequences and archetypal gags (Linus's blanket, Charlie Brown's kite, Lucy's competition with Beethoven, Charlie Brown's "pencil pal," the baseball sequences) that characterize his breakthrough work.

One long-running gag, given treatment in multiple strips for the first time in 1958, is Charlie Brown's yearly failure to get any valentines. In *Peanuts, A Golden Celebration*, published shortly before his death, Schulz told a Valentine's story from his own childhood. When he was in first grade, his mother helped him get valentines for everybody in his class, so that nobody would be offended by not getting one; but he felt too shy to put them in the box at the front of the classroom, and so he took them all home again to his mother. At first glance, Schulz's story recalls a strip on page 97 of this volume: Charlie Brown peers over a fence at a swimming pool full of happy kids, then he goes home and sits by himself in a bucket of water. But Schulz, unlike Charlie Brown, had a mother on duty — a mother to whom he chose to give his whole basket of valentines.

A child deeply scarred by a failure to get valentines would probably not grow up to draw lovable strips about the pain of never getting valentines. (A child like that — one thinks of R. Crumb — might instead draw a valentine box that morphs into a female body part that devours his valentines and then devours him, too.) Beneath the conventional narrative of Schulz's childhood failures is the story of a happy young man oversupplied with parental love. His little family's closeness gave him strength; its closedness probably helped estrange him from the world. Love feeding art feeding estrangement feeding forgiveness: the gifts Schulz was given became his gift to us.

CHARLES M. SCHULZ · 1922 TO 2000

Charles M. Schulz was born November 26, 1922, in Minneapolis. His destiny was foreshadowed when an uncle gave him, at the age of two days, the nickname "Sparky" (after the racehorse Spark Plug in the newspaper strip *Barney Google*).

Schulz grew up in St. Paul. By all accounts, he led an unremarkable, albeit sheltered, childhood. He was an only child, close to both parents. His eventual career path was nurtured by his father, who bought four Sunday papers every week — just for the comics.

An outstanding student, he skipped two grades early on, but began to flounder in high school — perhaps not so coincidentally at the same time kids are going through their cruelest, most status-conscious period of socialization. The pain, bitterness, insecurity, and failures chronicled in *Peanuts* appear to have originated from this period of Schulz's life.

Although Schulz enjoyed sports, he also found refuge in solitary activities: reading, drawing, and watching movies. He bought comic books and Big Little Books, pored over the newspaper strips, and copied his favorites — *Buck Rogers*, the Walt Disney characters, *Popeye*, *Tim Tyler's Luck*. He quickly became a connoisseur; his heroes were Milton Caniff, Roy Crane, Hal Foster, and Alex Raymond.

In his senior year in high school, his mother noticed an ad in a local newspaper for a correspondence school, Federal Schools (later called Art

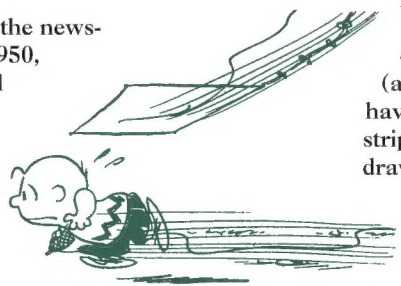
Instruction Schools). Schulz passed the talent test, completed the course, and began trying, unsuccessfully, to sell gag cartoons to magazines. (His first published drawing was of his dog, Spike, and appeared in a 1937 *Ripley's Believe It or Not!* installment.)

After World War II had ended and Schulz was discharged from the army, he started submitting gag cartoons to the various magazines of the time; his first breakthrough, however, came when an editor at *Timeless Topix* hired him to letter adventure comics. Soon after that, he was hired by his alma mater, Art Instruction, to correct student lessons returned by mail.

Between 1948 and 1950, he succeeded in selling 17 cartoons to the *Saturday Evening Post* — as well as, to the local *St. Paul Pioneer Press*, a weekly comic feature called *Li'l Folks*. It ran in the women's section and paid $10 a week. After writing and drawing the feature for two years, Schulz asked for a better location in the paper or for daily exposure, as well as a raise. When he was turned down on all three counts, he quit.

He started submitting strips to the newspaper syndicates. In the spring of 1950, he received a letter from the United Feature Syndicate, announcing its interest in his submission, *Li'l Folks*. Schulz boarded a train in June for New York City; more interested in doing a strip than a panel, he also brought along the first installments of what would become *Peanuts* — and that was what sold. (The title, which Schulz loathed to his dying day, was imposed by the syndicate). The first *Peanuts* daily appeared October 2, 1950; the first Sunday, January 6, 1952.

Prior to *Peanuts*, the province of the comics page had been that of gags, social and political observation, domestic comedy, soap opera, and various adventure genres. Although *Peanuts* changed, or evolved, during the 50 years Schulz wrote and drew it, it remained, as it began, an anomaly on the comics page — a comic strip about the interior crises of the cartoonist himself. After a painful divorce in 1973 from which he had not yet recovered, Schulz told a reporter, "Strangely, I've drawn better cartoons in the last six months — or as good as I've ever drawn. I don't know how the human mind works." Surely, it was this kind of humility in the face of profoundly irreducible human questions that makes *Peanuts* as universally moving as it is.



Diagnosed with cancer, Schulz retired from *Peanuts* at the end of 1999. He died on February 12, 2000, the day before his last strip was published (and two days before Valentine's Day) — having completed 17,897 daily and Sunday strips, each and every one fully written, drawn, and lettered entirely by his own hand — an unmatched achievement in comics.
